

EVOLUTION WORKS

**Stray dog, all alone, Feel lucky just to find a bone
Ain't no place that he belong
Every turn he takes just seem to be wrong**

**Long road ahead of me, The ends in sight but I can't see
Where I'm going or who might care
But when I'm gone I guess I'm there**

**Feel like I'm living proof evolution works
Spent too much time with losers and jerks
Just a leaf turning brown on the family tree
World will do fine without anymore help from me**

**Sorry Daddy but your seeds been wasted
But that's alright Mama, least the fruit got tasted
Don't know if I always love her, don't know if she cares
Just know life without her just couldn't be bared**

**Long road ahead of me, The ends in sight but I can't see
Where I'm going or who might care
But when I'm gone I guess I'm there**

**Feel like I'm living proof evolution works
Spent too much time with losers and jerks
Just a leaf turning brown on the family tree
World will do fine without anymore help from me**

**Fuck the trees in the forest, That ain't what I need to know
What about the stuff in my attic, Does it exist after I go?**
