

FOREVER WITH YOU (M.L.U.)

**Love is a long, long road, honey,
Takes a lot of time but I don't mind
There ain't nothing that I'd rather do
Just rollin' along forever with you**

**They say every man has to find his place in the sun,
And a place to feel loved when that day is done
You know darling, I believe that it's true
And baby I'm there, forever with you**

**I'm trying to move on and stop singin' the blues
I'm working things out and I'm paying some dues
When it comes to trades, You know I've jacked around a few
But the only thing I ever mastered, baby, was lovin' you**

**Spent a lot of time drifting, lost in the past
It's hard to move on but you better fast
Never thought of the future but now I sure do
And I know that I'll have one, forever with you**

**They say every man has to find his place in the sun,
And a place to feel loved when that day is done
You know darling, I believe that it's true
Baby I'm there, forever with you**

**I ain't no genius but I'm occasionally brilliant
I ain't bulletproof baby, but I'm amazingly resilient
When it comes to trades, You know I've jacked around a few
But the only thing I ever mastered, baby, was lovin' you**
