

SMILE

Go ahead and smile, Come on look happy...

**You sit at the window and look out at the yard
You try to do something but it's so hard, hard
You pick up the phone and it's just dialtone
You know there's a world but you feel so alone**

Go ahead and smile, Come on look happy...

**Your hands grip the wheel but you try not to steer
'Cause you don't know the way, that much is clear
Just when you think that you know where you are
You suddenly realize you've gone too far**

Go ahead and smile, Come on look happy...

**Jack can't complain but sometimes he still do
But it coulda been me, cause I know that I do
I'm sorry I'm down when I should be up
But I feel like I'm drowning in this half full cup**

Go ahead and smile, Come on look happy...

Go ahead and smile, Come on look happy...

**You sit at the window and look out at the yard
You try to do something but it's so hard, hard
You pick up the phone and it's just dialtone
You know there's a world but you feel so alone**

Go ahead and smile, Come on look happy...

Go ahead and smile, Come on look happy...
